Purpose

One retrieval query paired with one candidate memory.

Irrelevant: the memory does not support a response to the query.

Supporting: indirectly useful, but not the most direct evidence.

Directly relevant: strong evidence for answering the query.

Judge relevance to the query, not general importance. Do not use rule-based turn-count, damage, or health thresholds unless the query directly asks for that measurement.

Complete every label row, including memories that were not selected by retrieval.

Optional, but recommended for ambiguous labels or boundary decisions.

Use a stable short code such as A1 or A2.

Session 21FE3D: 6 queries x 16 atomic memories = 96 labels.

Rows marked AI_DRAFT are provisional labels generated for human review and must not be treated

as final gold labels.

MemoryText

On player turn 1 of Battle1, the player dealt 70 damage, equal to 70% of the enemies' combined maximum health, exhausted every card in hand, and ended the turn with 100% health.

On player turn 2 of Battle1, the player dealt 30 damage, equal to 30% of the enemies' combined maximum health, did not exhaust the hand, and ended the turn with 90% health.

The player completed Battle1 in 2 turns.

The player finished Battle1 in good condition with 90% health.

The player selected: Execute him.

On player turn 1 of Battle2, the player dealt 45 damage, equal to 64% of the enemies' combined maximum health, exhausted every card in hand, and ended the turn with 100% health.

On player turn 2 of Battle2, the player dealt 25 damage, equal to 36% of the enemies' combined maximum health, did not exhaust the hand, and ended the turn with 86% health.

The player completed Battle2 in 2 turns.

The player finished Battle2 in good condition with 86% health.

The player selected: Ignore his situation and keep going..

On player turn 1 of Battle3, the player dealt 44 damage, equal to 29% of the enemies' combined maximum health, did not exhaust the hand, and ended the turn with 100% health.

On player turn 2 of Battle3, the player dealt 52 damage, equal to 35% of the enemies' combined maximum health, did not exhaust the hand, and ended the turn with 92% health.

On player turn 3 of Battle3, the player dealt 54 damage, equal to 36% of the enemies' combined maximum health, did not exhaust the hand, and ended the turn with 83% health.

The player completed Battle3 in 3 turns.

The player finished Battle3 in good condition with 83% health.

The player selected: Execute him.

On player turn 1 of Battle1, the player dealt 70 damage, equal to 70% of the enemies' combined maximum health, exhausted every card in hand, and ended the turn with 100% health.

0	This memory does not describe whether the player exhausted their hand.
0	Explicitly records that the player did not exhaust the hand, so it does not answer this query.
0	Explicitly records that the player did not exhaust the hand, so it does not answer this query.
0	Explicitly records that the player did not exhaust the hand, so it does not answer this query.

0	This memory does not describe whether the player exhausted their hand.
0	This memory does not describe whether the player exhausted their hand.
0	This memory does not describe whether the player exhausted their hand.
1	Provides indirect evidence of the player's tactical decisions, but not of their treatment of Rowan's forces.
1	Provides indirect evidence of the player's tactical decisions, but not of their treatment of Rowan's forces.
1	Provides indirect evidence of tactical efficiency regardless of whether the recorded duration is short or long.
0	Does not provide useful evidence about tactical choice or treatment of Rowan's forces.
2	Directly records how the player treated a defeated member of Rowan's forces, providing strong evidence for Rowan's judgement.
1	Provides indirect evidence of the player's tactical decisions, but not of their treatment of Rowan's forces.
1	Provides indirect evidence of the player's tactical decisions, but not of their treatment of Rowan's forces.
1	Provides indirect evidence of tactical efficiency regardless of whether the recorded duration is short or long.
0	Does not provide useful evidence about tactical choice or treatment of Rowan's forces.
2	Directly records how the player treated a defeated member of Rowan's forces, providing strong evidence for Rowan's judgement.
1	Provides indirect evidence of the player's tactical decisions, but not of their treatment of Rowan's forces.
1	Provides indirect evidence of the player's tactical decisions, but not of their treatment of Rowan's forces.

1	Provides indirect evidence of the player's tactical decisions, but not of their treatment of Rowan's forces.
1	Provides indirect evidence of tactical efficiency regardless of whether the recorded duration is short or long.
0	Does not provide useful evidence about tactical choice or treatment of Rowan's forces.
2	Directly records how the player treated a defeated member of Rowan's forces, providing strong evidence for Rowan's judgement.
1	Provides supporting evidence through the player's health at the end of a turn, but is not the final encounter condition.
1	Provides supporting evidence through the player's health at the end of a turn, but is not the final encounter condition.
0	Encounter duration does not record the player's health, wounds, or struggle state.
2	Directly records the player's finishing health and therefore directly answers whether the player ended wounded or in good condition.
0	The narrative choice does not describe the player struggling or finishing wounded.
1	Provides supporting evidence through the player's health at the end of a turn, but is not the final encounter condition.
1	Provides supporting evidence through the player's health at the end of a turn, but is not the final encounter condition.
0	Encounter duration does not record the player's health, wounds, or struggle state.
2	Directly records the player's finishing health and therefore directly answers whether the player ended wounded or in good condition.
0	The narrative choice does not describe the player struggling or finishing wounded.
1	Provides supporting evidence through the player's health at the end of a turn, but is not the final encounter condition.

1	Provides supporting evidence through the player's health at the end of a turn, but is not the final encounter condition.
1	Provides supporting evidence through the player's health at the end of a turn, but is not the final encounter condition.
0	Encounter duration does not record the player's health, wounds, or struggle state.
2	Directly records the player's finishing health and therefore directly answers whether the player ended wounded or in good condition.
0	The narrative choice does not describe the player struggling or finishing wounded.
2	Directly records battle performance during a player turn; relevance does not depend on the damage value.
2	Directly records battle performance during a player turn; relevance does not depend on the damage value.
2	Directly records encounter duration as a battle-performance outcome, regardless of whether it was short or long.
2	Directly records the player's finishing condition as a battle-performance outcome, regardless of the health value.
2	Directly records an important narrative choice that should be considered at battle end.
2	Directly records battle performance during a player turn; relevance does not depend on the damage value.
2	Directly records battle performance during a player turn; relevance does not depend on the damage value.
2	Directly records encounter duration as a battle-performance outcome, regardless of whether it was short or long.
2	Directly records the player's finishing condition as a battle-performance outcome, regardless of the health value.
2	Directly records an important narrative choice that should be considered at battle end.

	Directly records battle performance during a player turn; 2 relevance does not depend on the damage value.
	Directly records battle performance during a player turn; 2 relevance does not depend on the damage value.
	Directly records battle performance during a player turn; 2 relevance does not depend on the damage value.
	Directly records encounter duration as a battle- 2 performance outcome, regardless of whether it was short or long.
	Directly records the player's finishing condition as a battle- 2 performance outcome, regardless of the health value.
	Directly records an important narrative choice that should 2 be considered at battle end.
